The pool is on the upper level, its great to cool off, enjoy the sunny days and the views. The primitive beauty of the landscape enchants anyone walking the paths or cycling the island's trails. Porto Santo's climate is dry and stable; its temperature does not vary much between seasons and it is possible to go to the beach all year round. In the summer months, the average sea water temperature is mild, between 24 °C and 25 °C, as in the late spring and early autumn. For the remaining seasons of the year when the water temperature is pleasant, there is variation from one to two degrees cooler than in summer. The safety, along with the warm welcome of its locals, the pleasures that nature has to offer, the beautiful beaches of fine sand, and the calm sea currents, turn Porto Santo island into a privileged location amongst other similar destinations.
